

Shopify pending payments and follow-up

QUICK REFERENCE GUIDE — CUSTOMER SUCCESS · FULL SOP: SOP-CS-004

1. Open Shopify Orders and filter to **Pending orders**, **Terms**, and **Not paid**.
2. Sort by date. Flag any **Pending** order older than 72 hours, any high-value order, and anything close to month-end.
3. For **Terms** / **Not paid**, verify the term against SOP-CS-003 before chasing.
4. Open the customer in Shopify and check ACT notes. Confirm the preferred channel (phone vs. email) and the correct payment contact — it may not be the account holder.
5. Post a short note in the Sales team channel before reaching out: “I’m going to call this customer about a pending payment order.”
6. Wait for the account’s rep to acknowledge. If they’re already on it, log the handoff and move on.
7. Call or email the payment contact. Use the channel that matches the customer’s history.
8. Log the outcome in the ACT: contact made, payment promised, dispute, or no answer.
9. During end-of-month closing, run a full cleanup of the **Pending** and **Terms/Not paid** lists.
10. Escalate any unresolved high-value or aged order to the CS Lead.

COMMON MISTAKE

Calling a customer before coordinating with Sales. Duplicate outreach damages the relationship and is logged as an incident. Always post in the Sales channel first.

TIP

If a customer ignores email but answers the phone (or vice versa), record it in the ACT notes so the next CS member doesn’t repeat the wrong channel.

SHORTCUT

Filter Shopify Orders to “Pending orders” and sort by date to see the oldest unpaid orders first — that’s the daily follow-up list in priority order.

If unsure of any step, see full SOP-CS-004.
