

Popa Vape Flavour Shot order processing

QUICK REFERENCE GUIDE — CUSTOMER SUCCESS · FULL SOP: SOP-CS-010

1. Open the **POPA VAPE ORDERS** folder in Outlook and select the incoming order email.
2. Save the CSV attachment locally and confirm the requesting store address.
3. Open the **FLVR SHOT** Shopify store and click **Create order**.
4. Select the customer: **Popa Vape** (no city name).
5. Search each flavour, select the **Box of 10** variant, and check the **Available** count before adding.
6. Enter the requested quantity in boxes only (1 means 1 box).
7. Apply the **10% VIP discount**. Add shipping fees unless the order is \$1000+ before tax (free shipping).
8. Verify shipping and billing addresses from the customer's saved addresses; confirm unit and postal code. Make sure it matches the email.
9. Add the **PO number** in order note and 'Gabriel' in tags.
10. Save the draft and print the invoice as PDF via Vify Order Printer.
11. Email the invoice to the customer (reply to original email) with **factures@popavape.com** on copy. Change subject to: *Facture Flavor Shot* – <Location> – <PO> – <date>.
12. If any flavour was out of stock, list it in the email body and do not invoice it.

COMMON MISTAKE

Selecting the single-bottle variant instead of Box of 10. Customers cannot buy single bottles — every line must be the Box of 10 variant.

COMMON MISTAKE

Forgetting **factures@popavape.com** on the reply. It must be on every Flavour Shot email, every time — the customer's accounting workflow depends on it.

TIP

When the CSV has many flavours, use Excel's filter to group by quantity (Qty = 1, Qty = 3, Qty = 4). It cuts entry errors and makes the final review faster.

SHORTCUT

Never combine Flavour Shot with a DSS order. Flavour Shot ships separately and payment timing varies — process and invoice independently.

If unsure of any step, see full SOP-CS-010.
