

Vape Street Holdings order recreation

QUICK REFERENCE GUIDE — CUSTOMER SUCCESS · FULL SOP: SOP-CS-011

1. Open the franchise draft. Click **More actions** › **Duplicate**. A new draft is created.
2. On the new draft, click ... › **Remove customer** to remove the franchise customer.
3. Attach **Pamela Tremblay** as the customer. **Save**.
4. Open ... › **Edit shipping address**. Leave shipping as the franchise location, make sure it matches the original order. **Do NOT** pick from Pamela's saved addresses. **Save**.
5. Open ... › **Edit billing address**. Enter the billing address from **Angela Araujo's** credit-card authorisation file. **Save**.
6. Click **Add shipping or delivery** › **Custom shipping**. Name = **EXPRESS SHIPPING**. Price = **\$25** if subtotal < free shipping threshold. **Save**.
7. In **Notes**, type **SHIP EXPRESS!**.
8. Verify the **VAPESTREET** automatic discount and wholesale discount are present. Click **Create order**. Send invoice to **invoices@vapestreetcanada.com**.
9. Open the **original franchise draft**. Click **More actions** › **Cancel order**.
10. Keep **Restock inventory** checked. **Uncheck Send notification to customer**. Add internal note "**Order recreated under Pamela Tremblay account.**" Confirm.
11. Verify payment captures, the new order shows **Paid**, and the franchise order is **Cancelled** with no email sent.

COMMON MISTAKE

When the shipping-address dialog opens, Shopify lists Pamela Tremblay's saved addresses (e.g. Burrard). Do NOT pick one. Leave the franchise shipping fields as they came from the duplicate.

COMMON MISTAKE

Forgetting to uncheck Send notification to customer on the cancellation. Franchise staff must not receive a cancellation email for an order that has been recreated under Pamela Tremblay.

TIP

Save after every major change — customer assignment, shipping edit, billing edit, shipping line, notes. Shopify drops unsaved customer changes when you continue editing other panels.

SHORTCUT

Express line is always named EXPRESS SHIPPING — never "Express" or "Priority". The warehouse picks the express lane on a string match against EXPRESS SHIPPING + the SHIP EXPRESS! note.

If unsure of any step, see full SOP-CS-011.
