

Customers with payment terms: order verification and marking paid.

STANDARD OPERATING PROCEDURE — CUSTOMER SUCCESS

Document ID	SOP-CS-003
Document type	Standard Operating Procedure
Department	Customer Success
Owner	Customer Success Lead
Version	v1.0
Effective	May 2026
Status	Active

1. Purpose

This SOP defines how Customer Success staff verify customer payment terms, confirm outstanding balances, and mark Shopify orders as paid for wholesale customers who pay on terms rather than at checkout. It exists to keep the warehouse moving without releasing goods to customers with unresolved invoices.

2. Scope

Applies to all wholesale customers on the DSS Distro and Flavor Shot Shopify stores who hold a payment-terms agreement (30 days, 15 days, 24 hours, or other negotiated terms). Out of scope: retail orders paid at checkout, cash-on-delivery accounts, and accounting operations such as invoice reconciliation and tag clean-up, which are owned by Finance.

3. Where to find customer information

Two systems hold the information needed to confirm a customer is on terms and to verify the status of their account: the Customer Terms and Contracts file on the shared drive, and the customer record in Shopify Admin.

Customer Terms and Contracts file

- Location: Public → !DSS → Customer Terms and Contracts → **DSS Customer Terms and Contracts** (Excel).
- Path: P:\!DSS\Customer Terms and Contracts.
- The file lists payment terms (30 days, 15 days, 24 hours, etc.), signed contracts and agreements, credit card authorization forms, and expiration dates.
- Some long-standing customers (close contacts of David) may not have a signed agreement or credit card form on file. Treat the absence of a contract as a flag, not a block — escalate to the CS Lead before refusing the order.

Shopify Admin (DSS or Flavor Shot)

- Open the customer account from the **Clients** menu.
- Check the customer tags on the right-hand side.
- The tag `terms` identifies a customer who pays on terms. Without that tag, treat the order as a standard prepaid order.

4. Identifying terms orders in Shopify

Both Shopify stores expose a saved view that filters orders down to customers on payment terms. This is the working list for the day.

1. In Shopify Admin (DSS or Flavor Shot), open **Orders** in the left-side menu.
2. Open the dropdown menu at the top of the order list and select **Terms**.
3. The list displays every pending order from a terms customer that has not yet been marked as paid.

Figure 1 — Shopify Commandes view with the Terms saved view selected from the left-side dropdown.

Orders in this view can be **marked as paid before the customer's payment is received**, so long as they have no outstanding invoices. This is so the warehouse can pick and ship without delay. The trade-off is that every order in the view requires a payment-status check before it is released.

Figure 2 — Filtered Terms list showing pending orders with payment status (Paiement en attente) and fulfilment status (Non traité).

5. Verifying outstanding invoices

Before marking any **terms** order as paid, verify that the customer has no overdue invoices or outstanding balances. Two signals carry this information.

Signal 1 — Orders still showing in the Terms list

- If a customer's earlier orders are still in the **Terms** list (still has the **terms** tag), payment has not been received. Finance (Rosie) removes the **terms** tag once payment clears.
- Filter the list by customer name (search field) to see every open order against that account before releasing the new one.
- If the order still has the **terms** tag but they are within those terms (ex: 30 days), it is ok to mark their next order as paid. If the terms pass and the tag is still present, it becomes outstanding.

Signal 2 — Customer tags and the Not Paid view

- Open the customer account in Shopify and check tags for **not paid**. This is usually used when customers have 1-day terms.
- Finance (Rosie) removes the **not paid** tag once payment clears. Just like **terms**, if the tag is still present, payment has not been received.
- Similarly to above, if they are within the terms (1 day in this case), their next order can be marked as paid.

Figure 3 — The Not Paid saved view filters orders to those still tagged notpaid.

Figure 4 — Customer profile (Charles L'Espérance) showing the notpaid tag in the right-hand Balises panel.

Customer Success staff do not manage accounting tags directly. The responsibility is to read the tags correctly and confirm payment status before releasing an order.

6. Marking an order as paid

Once the verification steps in section 5 are complete and the customer has no outstanding balance, mark the order as paid so the warehouse can fulfil it.

1. Open the order from the **Terms** view.

2. Scroll to the **Payment pending** panel at the bottom of the order.
3. Click **Collect payment** → **Mark as paid**.
4. Confirm. The order moves to **Paid** status and is released to the warehouse queue.

Figure 5 — Order detail with *Percevoir le paiement* opened and *Marquer comme payée* highlighted.

7. Named-account procedures

A small number of accounts have specific handling rules that override the general flow. Some examples are listed below.

ACCOUNT	TERMS	PROCEDURE
Sarmad Bahr Aluloom	15 days	Reliable payer. If a payment is missed, send a reminder by email — phone is not effective for this account. Before marking a new order as paid, verify previous invoices are due-dated and paid.
XO Vape Saint-Amable (Marc-Antoine)	7 days	If an outstanding invoice exists, call Marc-Antoine directly. Provide invoice amount, order reference number, and invoice date. Payment usually arrives quickly by e-transfer. Mark the new order as paid only after Finance removes the unpaid tag.
Charles Espérance	1 day, Trusted account	Reliable payer with a close relationship to David. Orders can generally be marked as paid immediately without follow-up.

Sarmad Bahr Aluloom is the canonical reference example for the named-account flow. The screenshot below shows the order history Customer Success checks before releasing a new order: paid invoices (Payée • Traité) confirm the account is current; pending invoices (Paiement en attente) must be resolved first. Check this document for more special notes about customers: Customer profiles & order details. P : \Emna\Copy of Customer Profiles & Order Details.

Commande	Date	Client	Total	Statut du paiement	Statut du traitement de la commande	Articles	Mode de livraison	Balises

8. Combining DSS and Flavour Shot orders

DSS Distro and Flavor Shot are separate companies operating separate Shopify storefronts. Officially, orders are not shipped together. Operationally, they can be combined when all of the following conditions are met:

- Same customer account.
- Same shipping address.
- Orders placed within a short window of one another (same day, typically).

When orders are combined, leave a note on each order so the warehouse picks and packs them together:

- On the DSS order: *“Combine with...”*
- On the Flavor Shot order: *“Combine with...”*

***Important:** Do not write the order number when combining DSS and Flavor Shot orders together. Only write “Combine with...”

9. Shipping verification

If a terms order shows no shipping charge, confirm the reason before releasing it. The legitimate cases are listed below; anything else needs to be corrected before the order ships.

CONDITION	THRESHOLD OR RULE
DSS free shipping	Order subtotal over \$1,500 before tax.
Flavor Shot free shipping	Order subtotal over \$1,000 before tax.
Combined shipment	Shipping charged on one order only when paired per section 8.
Special agreement	Documented in the Customer Terms and Contracts file. Example: Vape Société — free shipping on Flavor Shot orders over \$250.

Verify against the customer's contract entry before assuming shipping was simply forgotten.

10. Weekly invoice send

Some accounts — Vap Boutique and Citronic for example — receive invoices on a weekly batch instead of per order. At the end of each calendar week:

1. Download every invoice raised against the account that week.
2. File the invoices by customer and by week in the shared drive.
3. Send all outstanding invoices for the account in a single email as part of regular follow-up.

If invoices were not downloaded before the orders were marked as paid, they can still be downloaded after the fact. The required outputs of this process are accurate follow-up, correct payment verification, and clear warehouse notes — the order in which the supporting documents are pulled does not change those outputs.

11. Reference files

- Customer Terms and Contracts: `P:\!DSS\Customer Terms and Contracts\DSS Customer Terms and Contracts.`
- Customer profiles and order details: `P:\Emna\Copy of Customer Profiles & Order Details.`

Non-Compliance

Releasing a terms order without completing the verification steps in sections 5 and 6 results in goods being shipped to a customer with an unresolved balance. The first occurrence is reviewed by the CS Lead; recurring breaches are escalated to the Director of Operations and may result in the loss of authority to mark orders as paid. Any shipment released to a delinquent account is reversed where possible and the variance is logged in the weekly CS review.

Exceptions

Deviations from this SOP — for example, releasing an order to a customer with an outstanding balance because David has personally approved the exposure, or combining shipments outside the section 8 criteria — require written approval from the CS Lead or David before the order is marked as paid. The approval (email or Teams message) is pasted into the order notes in Shopify so the decision trail stays with the order.
