| Effective     | May 2026                     |
| Status        | Active                       |

### 1. Purpose

This SOP defines how Customer Success processes wholesale orders received as CSV or Excel attachments from terms customers such as Sir Vape-A-Lot and Flamingo accounts. It standardises CSV upload through the Shopify Order Importer, stock verification against the Production File, draft order creation, and customer communication when stock is partial or unavailable.

### 2. Scope

Applies to every CSV or Excel order received at the DSS Info inbox from B2B terms customers. Covers single-customer orders (Sir Vape-A-Lot pattern) and multi-store rollups (Flamingo Manitoba, Alberta, and other Flamingo stores). There are other customers who place orders this way as well. Out of scope: retail web orders, EDI integrations, and credit-card-only customers, which follow SOP-CS-001 and SOP-CS-003.

### 3. Order intake

All customer orders arrive at the shared DSS Info mailbox so any team member can pick them up when the primary processor is absent.

- The order email normally contains the PDF purchase order, the CSV or Excel order file, and billing or shipping instructions.

- Open the email, confirm the PO or reference number, and download the CSV attachment to the local machine before opening Shopify.
- If the email is missing the CSV, reply to the customer and request it. Do not transcribe SKUs by hand.

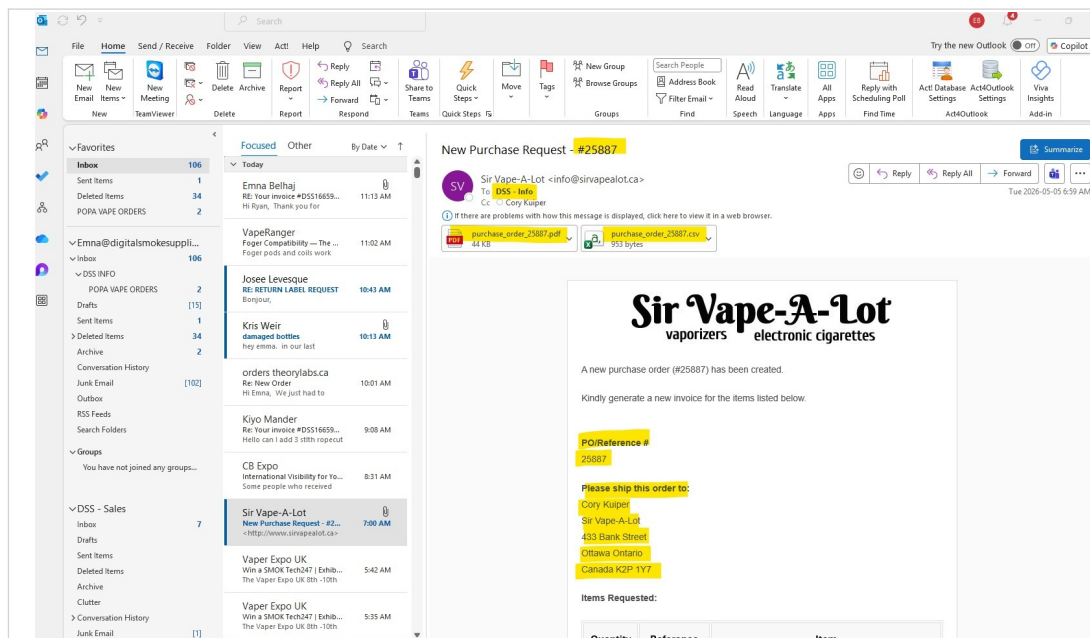

Figure 1 — Sir Vape-A-Lot order email at the DSS Info inbox with the PO number, CSV attachment, and ship-to address highlighted.

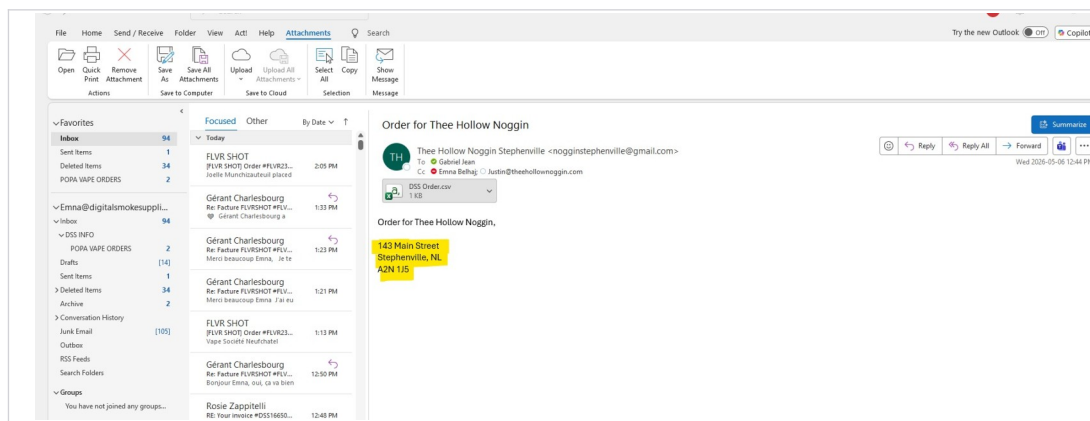

Figure 2 — Thee Hollow Noggins order with the CSV attachment and shipping address.

## 4. CSV upload and header mapping in Shopify

All CSV orders enter Shopify through the Order's up! CSV Order Importer app under Applications. Use the Single Order flow — not Pro Importer — for one customer per file.

1. In Shopify, open **Applications > Order's up! CSV Order Importer > Single order**.
2. Drag the CSV onto the **Upload or Drop file here** area. Accepted file types are .csv and .xlsx.
3. Wait for the file summary to populate (filename, lines, orders, fields).

4. Under **Map headers**, confirm **sku** → **SKU** and **qty** → **Quantity**. Click **Auto map** if either row is blank.
5. Review the **Order Preview** table. Every row must resolve to a barcode, a title, a quantity, a price, and a stock figure.

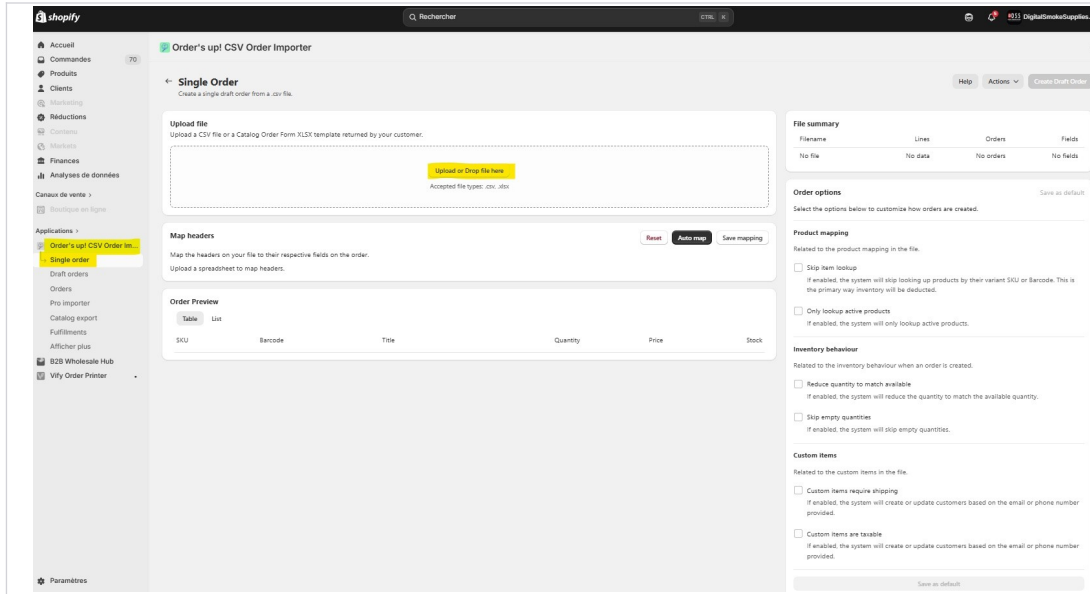

Figure 3 — Single Order screen of the CSV Order Importer with the file drop zone and Single order navigation entry highlighted.

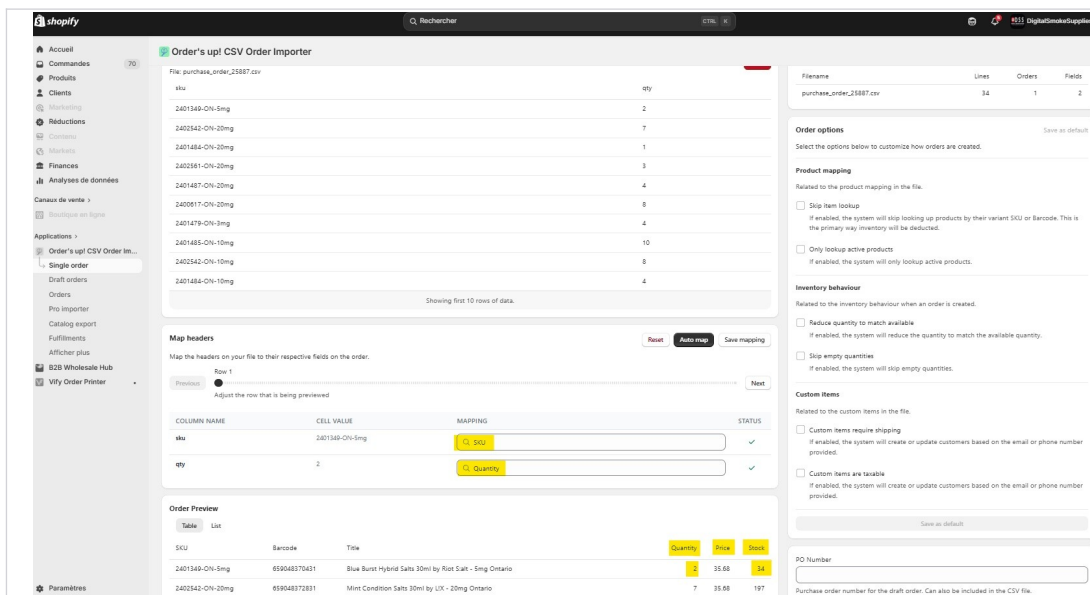

Figure 4 — Header mapping confirmed (sku, qty) and the order preview populated with SKUs, quantities, prices, and stock.

## 5. Product and stock verification

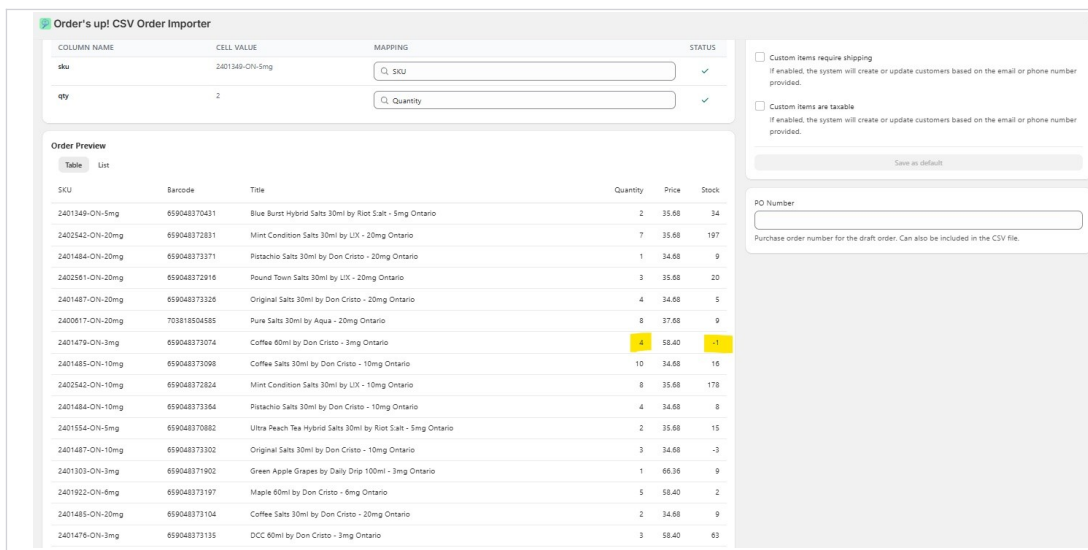

Pricing is managed automatically by Shopify, but stock must always be verified manually using the Production File. Cross-check every line before creating the draft.

## 5.1 Match the Excel file exactly

- Follow the SKUs and quantities written in the customer's Excel file. Do not substitute SKUs or round quantities.
- For each line in the preview, confirm the SKU, the variant title, and the quantity match the source file.

## 5.2 Read the stock column

- Positive stock that exceeds the order quantity — the line is safe to proceed.
- Negative or zero stock — flag the row. Do not assume stock; check the Production File before confirming the line.
- Stock shown as **Unknown** or barcode shown as **N/A** — the SKU is missing or new. Flag the line for manual lookup (see Section 6).

| SKU             | Barcode      | Title                                                        | Quantity | Price | Stock |
|-----------------|--------------|--------------------------------------------------------------|----------|-------|-------|
| 2401348-ON-5mg  | 659048370431 | Blue Burst Hybrid Salts 30ml by Riot Salt - 5mg Ontario      | 2        | 35.68 | 34    |

## 5.3 Confirm against the Production File

The Production File is the source of truth for available stock, unfinished inventory, and reserved quantities. Always refresh the file before reading it.

- Access the personal copy at **Public > Emna > Production File – Emna**. Working from a personal copy avoids save conflicts when the master file is being edited.
- Search the file with **Ctrl + F**. Search by full product name including province, for example “Original Salt 30ML by Don Cristo Ontario” or code.
- For each flagged SKU, verify: unfinished inventory, reserved quantities, and remaining available stock.

## 5.4 Availability calculation

If a product is short in Shopify but unfinished inventory exists, calculate the real availability before deciding to invoice or back-order.

| FIELD                             | EXAMPLE VALUE | NOTES                                  |
|-----------------------------------|---------------|----------------------------------------|
| Unfinished inventory              | 50            | From the Production File.              |
| Reserved on other orders          | 25            | Quantities promised to other invoices. |
| Current order quantity            | 7             | From the customer CSV.                 |
| Available (Unfinished – Reserved) | 25            | Sufficient — invoice in full.          |

| A               | B   | C             | D                                                | E | F | G | H |

Figure 7 — Annotated CSV where flagged rows show stock 0, 40 unfinished, and reserved quantities pulled from the Production File.

## Production stage matters

A product that is mixed today but not yet bottled is normally available the next day at the earliest. If the customer needs same-day shipping, tell them the liquid is mixed but not ready, and offer next-day instead. Stamping priorities, unfinished inventory holds, and province prioritisation are decided by David.

Figure 9 — Production File showing labelled/stamped units per province. 150(unfinished)-25-70-15 = 40 unfinished left.

## 6. Resolving missing SKUs in Flamingo orders

Flamingo CSVs are grouped by store (Manitoba, Alberta, others). Because the same Flamingo SKU prefix is reused across provinces, missing variants are common and must be cleaned up before the draft is created.

- In the order preview, look for **Item warnings** callouts and any line where the barcode is **N/A** or the stock is **Unknown**.
- Flag those rows in the Excel file with a distinct highlight colour. Common root causes: incorrect SKU, missing customer or province code in the SKU.

3. In the draft order, delete the broken line by clicking the ✕ beside the zero-priced product.
4. Use the **Add product** search to locate the correct variant by product name and province (for example **Riot Blue Burst 60ml MB 3mg**). Tick the correct **3mg Manitoba** or **6mg Manitoba** variant and click **Add**.
5. If no variant matches, the product may be new or not yet entered. Ask David or check **Teams > DSS Dashboard** before promising the line to the customer.

| Order Preview   |              |                                                                                          |          |       |       |

Figure 11 — STLTH lines showing stock status Unknown — these SKUs need manual confirmation in the Production File or with David.

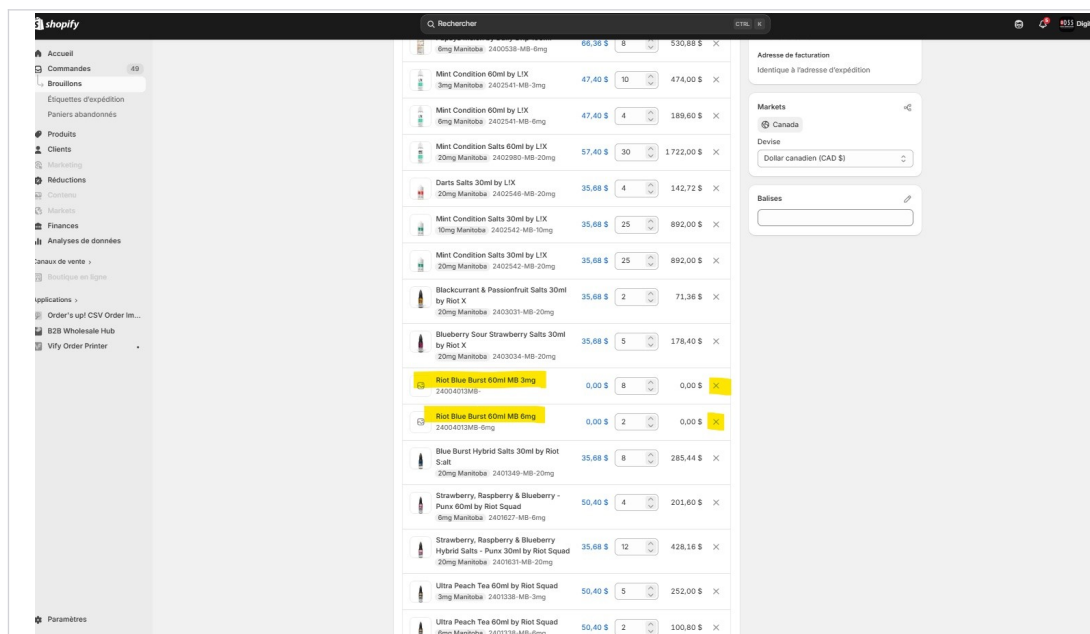

Figure 12 — Broken Riot Blue Burst lines with 0.00 \$ and the row-delete × used to remove them from the draft.

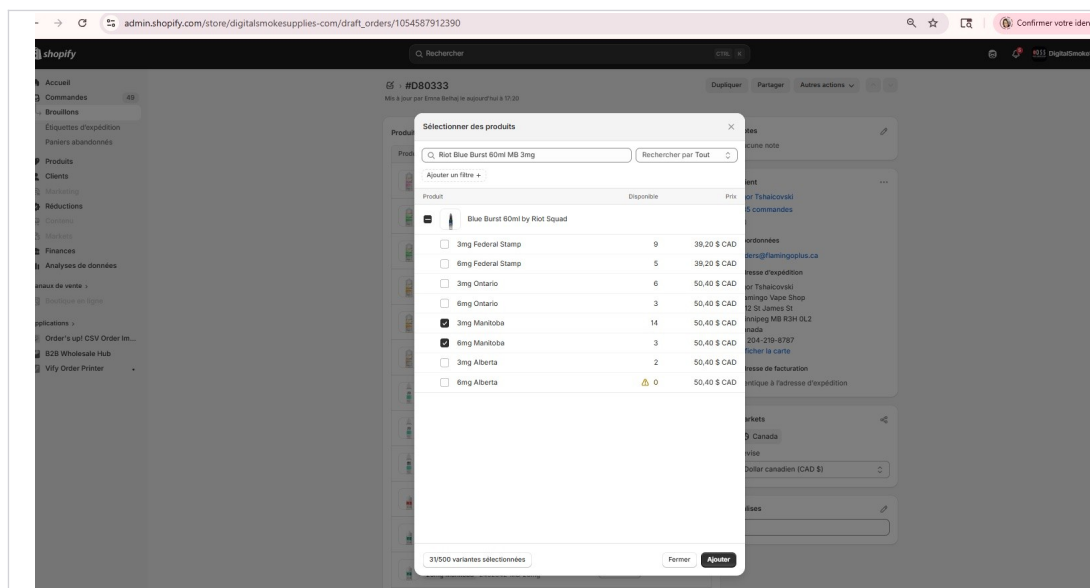

Figure 13 — Add product search for “Riot Blue Burst 60ml MB 3mg” with the correct Manitoba variants ticked.

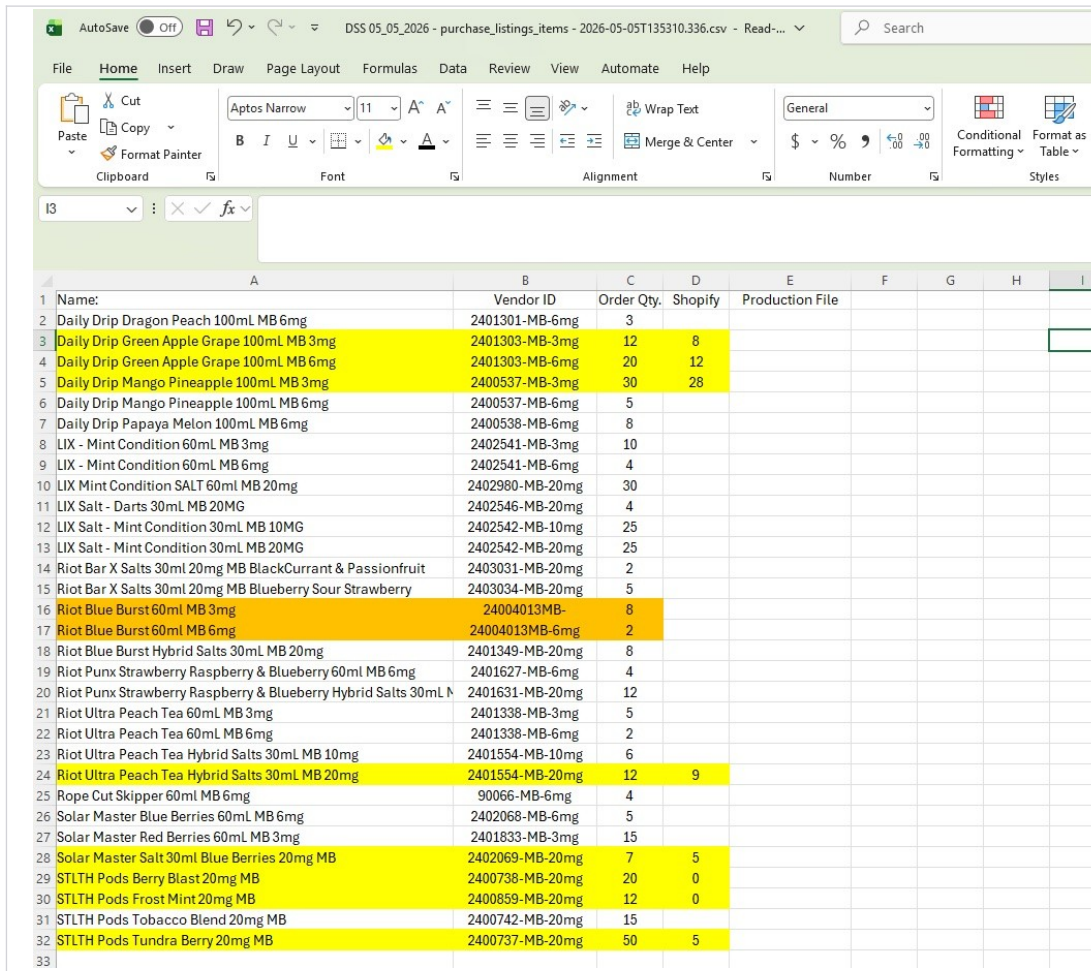

## 7. Highlight confirmed quantities in the Excel file

Before creating the draft, mark up the source Excel so the audit trail matches the invoice. The marked-up file is the working record for the order and supports back-order communication.

- Highlight confirmed quantities in green or yellow.
- Mark partial fills in orange and add the actual shipped quantity in the Shopify or Production File column.
- Mark missing or unmatched SKUs in a distinct colour (typically orange or red).

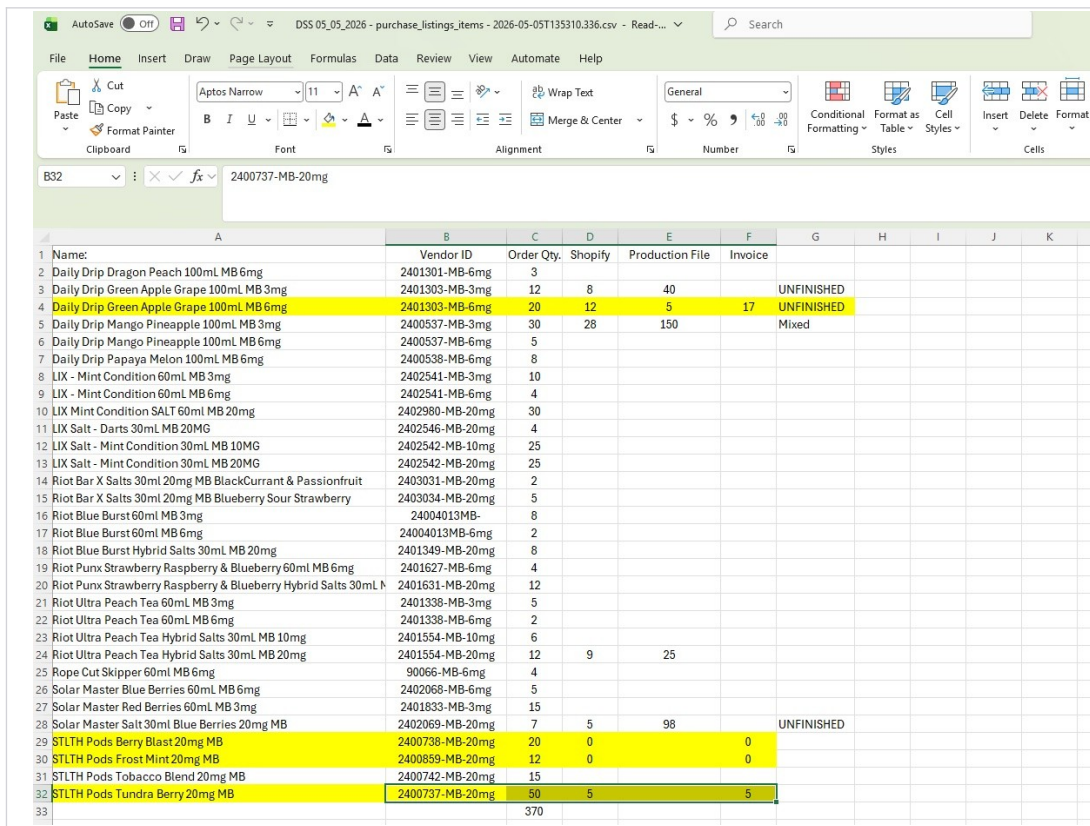

- Annotate **UNFINISHED** or stamping notes for any line that is partially fillable today but more is on the way.

## 8. Create the draft and verify the customer

1. In the CSV importer, click **Create Draft Order** in the top right.
2. On the confirmation modal, click **View order** to open the draft.
3. In the draft order, double-check: customer name, shipping address, billing address, shipping method, and any customer notes.
4. Confirm the PO number is recorded in the order notes (for example **#25887** for Sir Vape-A-Lot).
5. Confirm the customer tag and sales-rep tag (for example **SIRVAPEALOT**, **GABRIEL**) match the customer record.
6. If quantities differ from the customer's ask because of stock, edit them now to the actual shipped quantity. Do not invoice quantities we cannot ship.
7. Confirm the order is marked as paid or on terms as appropriate, then create the order.

**Order options**  
Select the options below to customize how orders are created.

**Product mapping**  
Related to the product mapping in the file.

☐ Skip item lookup  
If enabled, the system will skip looking up products by their variant SKU or Barcode. This is the primary way inventory will be deducted.

☐ Only lookup active products  
If enabled, the system will only lookup active products.

**Inventory behaviour**  
Related to the inventory behaviour when an order is created.

☐ Reduce quantity to match available  
If enabled, the system will reduce the quantity to match the available quantity.

☐ Skip empty quantities  
If enabled, the system will skip empty quantities.

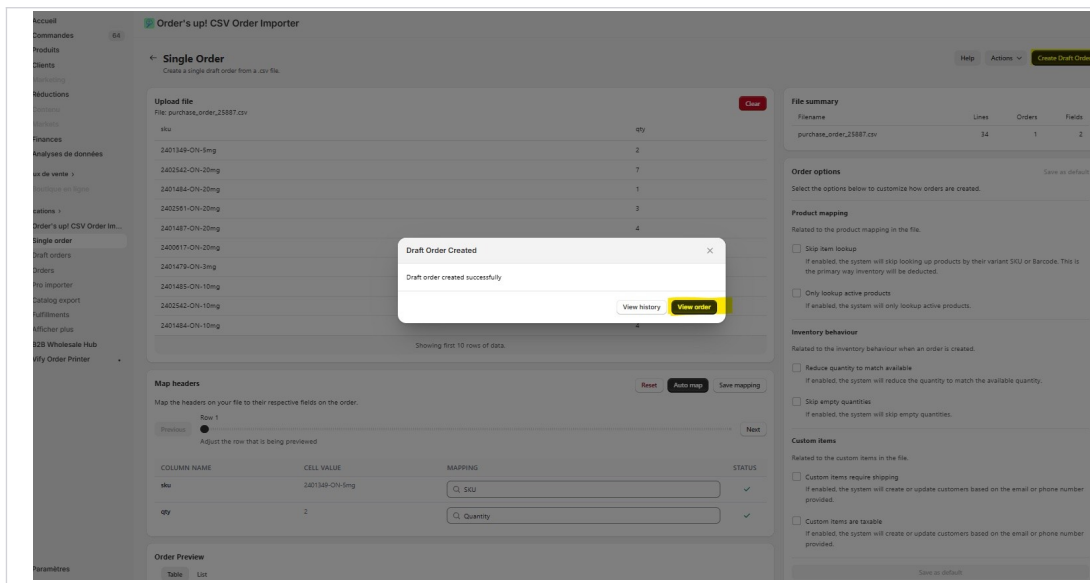

**Custom items**  
Related to the custom items in the file.

☐ Custom items require shipping  
If enabled, the system will create or update customers based on the email or phone number provided.

☐ Custom items are taxable  
If enabled, the system will create or update customers based on the email or phone number provided.

## 9. Customer communication for partial or out-of-stock orders

When the invoice ships short, the customer is told in the same email that carries the invoice. One clear email per order — no follow-up needed.

- Reply to the order email with the invoice attached.
- List each SKU that was not invoiced or was partially invoiced, with the reason (out of stock, not yet bottled, not yet stamped).
- For partial fills, state both the ordered quantity and the shipped quantity, for example “you ordered 20, we invoiced 17.”
- If the product is coming back in stock, say so and commit to a follow-up only when stock returns. Do not over-promise dates.

#### Standard wording — partial or out-of-stock invoice

Hello, thank you for your PO. Please find attached a copy of your invoice. Please note that we did not invoice <qty> of <product> as it is currently out of stock. We will keep you updated as soon as it is back in stock. Best regards, <name>.

## 10. Tracking missing or back-in-stock opportunities

Every short shipment becomes a sales opportunity once stock returns. Recording them keeps the next-order conversation easy and prevents missing repeat orders from large stores.

- Open **Teams > DSS – Sales Hub > Missing Opportunities**.
- Add the customer, SKU, ordered quantity, missed quantity, and the reason (out of stock, stamping, new product).
- When the SKU returns, contact the customer and offer them the chance to place a new order. Prioritise large accounts such as Alberta or Manitoba stores.
- If anything is unclear, ask David directly or post to the DSS Dashboard channel. Confirm stock before promising anything to a customer.

## 11. Workflow summary

| STEP | ACTION                                                       | SOURCE OF TRUTH        |
|------|--------------------------------------------------------------|------------------------|
| 1    | Receive order email at DSS Info, download CSV.               | Customer email         |
| 2    | Upload CSV through Order's up! Single Order.                 | Shopify CSV importer   |
| 3    | Confirm header mapping and order preview.                    | CSV file               |
| 4    | Verify each line against the Production File.                | Production File        |
| 5    | Resolve missing or unknown SKUs (delete + manual add).       | Shopify product search |
| 6    | Highlight confirmed and partial rows in the Excel file.      | CSV file               |

| 8    | Verify customer, address, tags, PO number, quantities.       | Shopify draft order    |
| 9    | Email the invoice; document partial fills in the body.       | Outlook                |
| 10   | Log missing or back-in-stock items in Missing Opportunities. | Teams                  |

## Non-Compliance

---

Skipping the Production File check, trusting Shopify stock alone, or invoicing SKUs that cannot ship the same day causes back-orders that the customer learns about only after the invoice arrives. The consequences are direct: refund or credit work, customer trust loss, and lost re-orders from large stores.

- Invoicing a quantity we cannot ship triggers a damaged-credit case under SOP-CS-004 and requires a refund or credit memo.
- Promising a delivery date for unfinished inventory without confirming the stamping or bottling stage will be flagged at the Sales review.
- Failing to record a back-order in Missing Opportunities forfeits the follow-up sale once stock returns.

## Exceptions

---

Deviations from this SOP require explicit approval before the draft is created.

- Substituting a SKU at the customer's request — requires written confirmation from the customer on the email thread and a note on the draft order.
- Releasing security stock or unfinished inventory ahead of schedule — approved by David only.
- Shipping partially before completing the Excel mark-up and Missing Opportunities entry — approved by the Customer Success Lead, with the back-fill logged the same day.
