

Popa Vape Flavour Shot order processing.

STANDARD OPERATING PROCEDURE — CUSTOMER SUCCESS

Document ID	SOP-CS-010
Document type	Standard Operating Procedure
Department	Customer Success
Owner	Customer Success Lead
Version	v1.0
Effective	June 2026
Status	Active

1. Purpose

This SOP defines the manual workflow for processing Popa Vape Flavour Shot (FLVR SHOT) orders received by email. The Flavour Shot catalogue is not integrated with the main Shopify configuration, so every order is entered, verified, and invoiced by hand. The procedure exists to prevent stock errors, misshipments, and billing mistakes that cannot be caught automatically.

2. Scope

Applies to Customer Success staff handling Flavour Shot orders for Popa Vape stores in Quebec and Ontario. Covers email intake, draft order creation in the FLVR SHOT Shopify store, stock verification, discount and shipping rules, invoicing, and customer communication.

Out of scope: Popa Vape orders placed directly on Shopify by the customer (those flow through the standard order path) and DSS Distro orders, which follow SOP-CS-006 for CSV bulk entry.

3. Customer accounts and intake

Flavour Shot orders arrive by email from Popa Vape and land in the dedicated Outlook folder POPA VAPE ORDERS. Each email carries a CSV attachment listing the products and quantities requested for one store.

The account used in the FLVR SHOT Shopify store is **Popa Vape**.

- Make sure this account is selected, not any accounts with a city name. (ex: Popa Vape Matane)

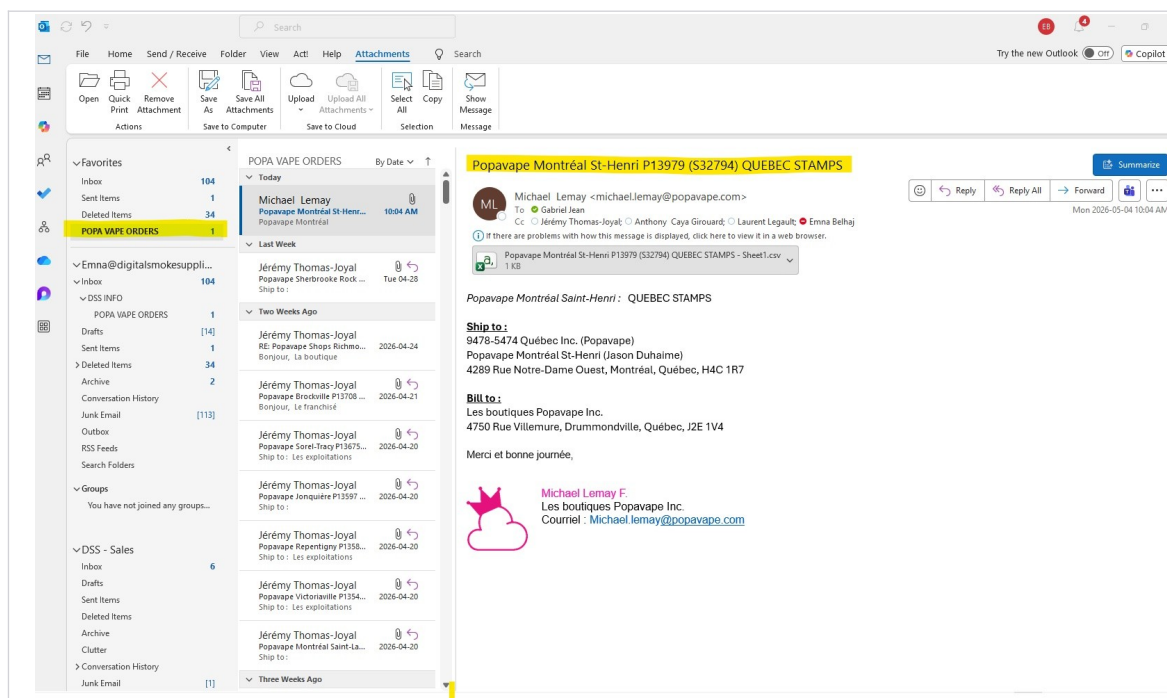

Figure 1 — POPA VAPE ORDERS folder in Outlook with the incoming CSV attachment and store address details.

4. Product naming and box rule

Each line of the CSV follows this structure:

- **Product Title : Quantity**

Examples:

- BlackBerry Mojito Exotic : 1
- Sweet Mango Mojito : 2

Customers cannot purchase single bottles. All Flavour Shot products ship in boxes of 10 units. Verify that every quantity follows the box rule before adding the line to the draft order.

5. Step-by-step procedure

1. Open the POPA VAPE ORDERS Outlook folder and select the incoming order email.
2. Save the CSV attachment locally and confirm the requesting store address.
3. Open the FLVR SHOT Shopify store and click **Create order**.

Order	Date	Customer	Total	Payment status	Fulfillment status	Items	Delivery status	Delivery method	Tags
#FLVR23516	2:28 pm	Popa Vape Riviere du Loup	\$186.20	Payment pending	Unfulfilled	6 items		Express

Figure 2 — FLVR SHOT Shopify Orders dashboard. Use Create order to start a new draft.

4. Search for the requested customer account: **Popa Vape**.
5. Enter each product line manually. Search by flavour name (for example *Watermelon Lime*) and select the **Box of 10** variant — never the single-bottle variant.
6. Verify the **Available** stock count for each Box of 10 variant before confirming the line. Never assume stock is available.

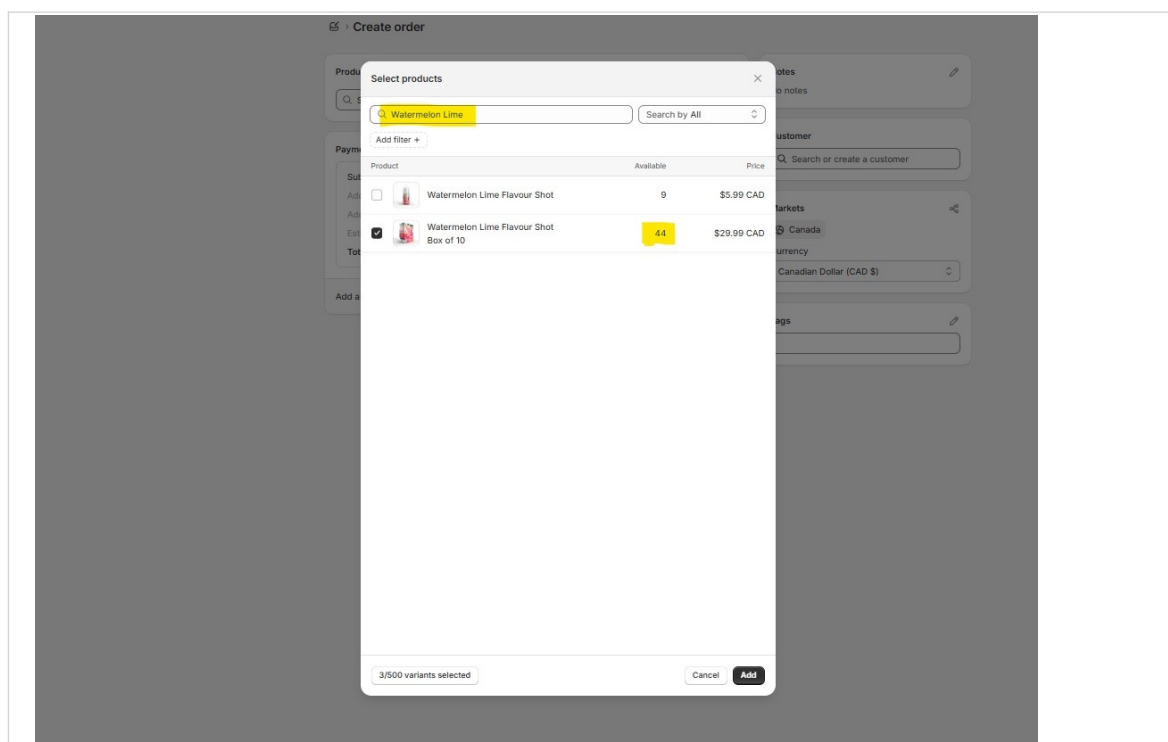

Figure 3 — Selecting Watermelon Lime Flavour Shot Box of 10 with 44 units available.

7. Enter the requested quantity in boxes (not bottles) for each line. (1 = 1 box of 10)
8. Apply the 10% VIP discount and any eligible free-shipping rule (see section 7).
9. Verify shipping and billing addresses against the customer's saved addresses (see section 8).
10. Add the PO number in the order note and 'Gabriel' in the tags.
11. Run the draft order verification checklist (see section 9), then save the draft and generate the invoice.
12. Print the invoice to PDF and send the customer email (see section 10).

6. Stock verification and out-of-stock handling

Stock must be verified manually for every product line. The Available column inside the Shopify product picker is authoritative. Treat any value of 0 or below as out of stock.

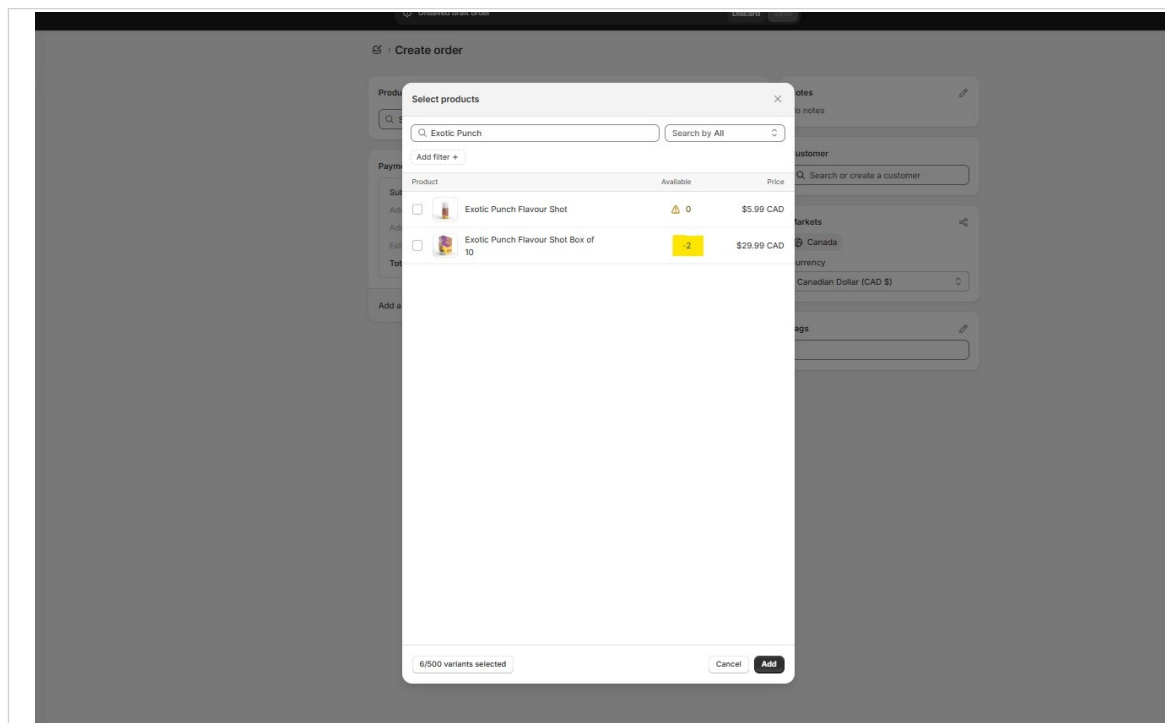

Figure 4 — Exotic Punch Flavour Shot Box of 10 showing -2 available. Do not invoice this flavour; flag it in the customer email.

When a flavour is unavailable:

- Do not invoice the unavailable flavour.
- Mention the shortage clearly in the customer email.
- Do not reserve inventory or monitor restocks automatically.
- If the customer asks when stock will return, check with David. David manages Flavour Shot inventory and incoming stock.

When an order contains many lines and quantities, use the Excel filter inside the CSV file to group products by quantity (Qty = 1, Qty = 3, Qty = 4) before entering the lines. After entering, review the full order one more time and confirm every product is present and every quantity matches the customer PO.

7. Discount and shipping rules

VIP discount

Every Popa Vape customer is eligible for an automatic 10% VIP discount. Apply this discount when creating the draft order.

Shipping

Flavour Shot orders ship separately from DSS Distro orders. They are not combined automatically. Apply shipping fees normally unless the order qualifies for free shipping.

Free shipping applies only when the order total reaches \$1000 before tax. Below that threshold, the customer pays shipping.

Do not wait to combine shipments.

Popa Vape Flavour Shot orders ship on their own. The older practice of waiting for a DSS order to combine shipments is discontinued because payment timing varies too much between the two streams.

8. Address verification

Before saving the draft, verify all four address fields:

- **Shipping address**
- **Billing address**
- **Unit or apartment number**
- **Postal code**

Procedure:

1. Open the customer account (**Popa Vape**).
2. Click the three-dot menu on the right and open the shipping section.
3. Search the saved addresses and match the entry that corresponds to the requesting store. Example: *489 Rue Notre-Dame Ouest, Montréal, QC H4C 1A7*.
4. If multiple saved addresses match, confirm against the store name and PO before selecting one.

9. Draft order verification checklist

Before generating the invoice, confirm every item on the checklist below.

ITEM	WHAT TO VERIFY
Products	Every requested flavour is present and matches the customer CSV.
Quantities	Only boxes of 10 are selected, no single bottles.
Discounts	10% VIP discount is applied.
Shipping fees	Free shipping is applied only if the order is \$1000 or more before tax.

Shipping address	Matches the requesting store in the email; unit and postal code are correct.
Billing address	Matches the Popa Vape billing address in the email.
Tags	PO number is recorded in the notes, 'Gabriel' is in tags.
Out-of-stock items	Removed from the invoice and flagged for the customer email.

10. Invoice and customer email

Generate the invoice from the saved draft using the Vify Order Printer app. Print the invoice as a PDF and attach it to the customer email.

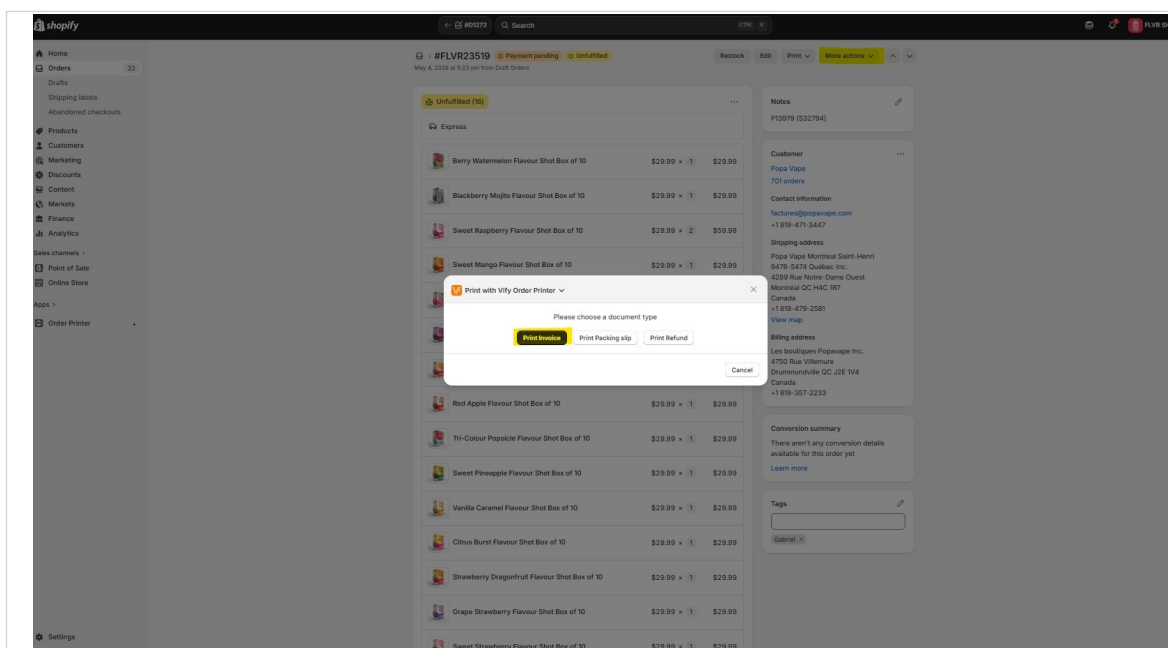

Figure 5 — Saved order with Vify Order Printer dialog. Use Print Invoice to download the PDF.

Email subject line

Reply to the original email and change the subject. Format every Flavour Shot invoice subject the same way:

- **Facture Flavor Shot – <Store Location> – <PO number> – <date>**

Example:

- *Facture Flavor Shot – Montréal St. Henri – PO12345 – May 7*

Include the PO number, the phrase “Facture Flavor Shot”, and the date so the message is easy to find later.

Recipients

Always include factures@popavape.com on every reply. Reply to the original email so that the person who sent it is the primary recipient.

Email body template

Use the French template below. Replace [Saveur 1], [Saveur 2] with any out-of-stock flavours, or remove the rupture-de-stock paragraph if every requested flavour was invoiced.

Customer email template

Bonjour [Prénom],

Merci pour votre PO. Vous pouvez trouver en pièce jointe une copie de votre facture.

Veillez noter que nous n'avons pas facturé les saveurs suivantes en raison d'une rupture de stock :

- [Saveur 1]
- [Saveur 2]

Merci de nous aviser si vous avez des questions.

Cordialement,

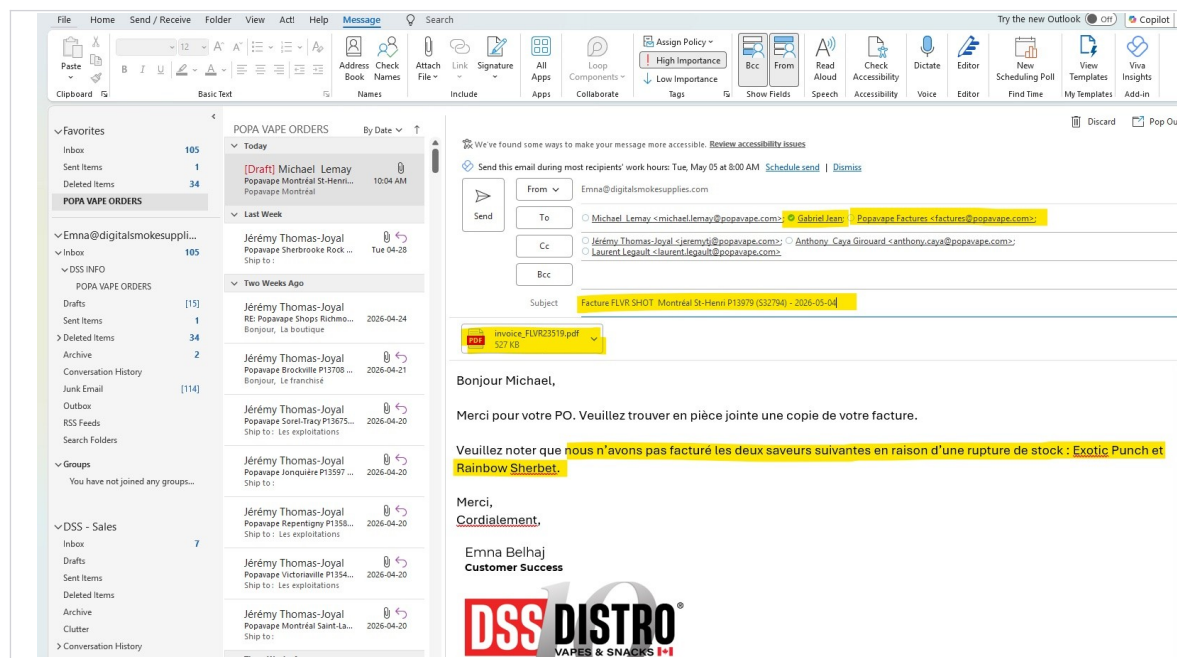

Figure 6 — Outgoing customer email with the invoice PDF attached, factures@popavape.com on copy, and the out-of-stock flavours called out in the body.

11. Documentation and key reminders

Always:

- Verify stock manually before adding a line.
- Document the order with screenshots when an unusual case arises.
- Communicate shortages clearly in the customer email.
- Double-check addresses and discounts before sending the invoice.

Never:

- Assume stock is available.
- Combine Flavour Shot and DSS Distro orders.
- Promise restock dates without confirmation from David.

Non-Compliance

Failing to follow this SOP creates direct customer impact and financial loss:

- Invoicing an out-of-stock flavour forces a refund or credit note and damages the customer relationship.
- Entering a single-bottle variant instead of a Box of 10 results in incorrect pricing and a short shipment.
- Omitting factures@popavape.com from the reply chain breaks the customer's internal accounting workflow.
- Applying free shipping below the \$1000 before-tax threshold reduces margin and triggers a finance review.

Repeated breaches are escalated to the Customer Success Lead and logged against the responsible agent for coaching.

Exceptions

Deviations from this SOP require approval before the draft is saved:

- Free shipping below the \$1000 threshold — requires Customer Success Lead approval, recorded as a note on the draft order.
- Combining Flavour Shot with a DSS Distro shipment — requires both Customer Success Lead and David's approval; not permitted for new orders without written confirmation.
- Holding an order for a future restock — only when David confirms incoming stock in writing. Otherwise process the order as out of stock and let the customer reorder.
