

Excise stamp ordering.

STANDARD OPERATING PROCEDURE — OPERATIONS

TYPE

02

SOP

DOCUMENT ID	SOP-OPS-002
DEPARTMENT	Operations
EFFECTIVE	30 April 2026
VERSION	1.0
OWNER	Operations Manager
FREQUENCY	Monthly — last working day of month

Schedule

Execute this procedure on the last working day of every month, before end-of-day. Stamps typically arrive within 5–7 business days of CRA approval, so ordering at month-end keeps the following month fully covered without holding excess inventory.

Purpose

This SOP defines the standard procedure for ordering excise vaping stamps from the Canada Revenue Agency through the Excise Stamping System. It ensures stamp inventory is replenished on a predictable cycle, prevents production stoppages caused by stockouts, and maintains a consistent 45-day cushion across all provinces.

Scope

Applies to all vaping product excise stamps ordered by DSS Distro across the eight active jurisdictions: Alberta, Canada (federal), Manitoba, New Brunswick, Nova Scotia, Ontario, Prince Edward Island, and Quebec. The procedure is executed in CannTrack and the CRA Excise Stamping System.

Cushion rule

Target inventory equals 1.5× the previous month's usage — roughly 45 days of cover. Always round order quantities up to the next 1,000-stamp increment. For high-volume SKUs (Canada, Quebec, Ontario), round up to the next 5,000.

Procedure — Part 1: Pull current inventory

- 1 Log into CannTrack and navigate to Inventory → Stamp Inventory. The current snapshot lists Total, Applied, Unused, Spoiled, Received Bad and Destroyed stamps for each jurisdiction.
- 2 Click EXPORT CSV. Save the file locally (location does not matter — it is a working file). Open the CSV and remove every column except Stamp Type, Region and Unused. These are the only fields needed for the planning sheet.

Stamp Type	Total	Applied	Unused	Spoiled	Received Bad	Destroyed
Vaping - Alberta	12,000	11,272	657	1	4	66
Vaping - Canada	1,337,000	1,319,068	5,856	36	3	12,037
Vaping - Manitoba	16,000	13,741	2,247	3	4	5
Vaping - New Brunswick	5,500	4,942	545	0	0	13
Vaping - Nova Scotia	2,500	264	2,234	0	2	0
Vaping - Ontario	195,000	186,859	7,539	80	8	514
Vaping - Prince Edward Island	3,000	2,389	642	1	0	7
Vaping - Quebec	670,000	649,694	19,301	163	22	820

Figure 1 — CannTrack Stamp Inventory page. Note the EXPORT CSV and ORDER STAMPS buttons.

Procedure — Part 2: Pull current month usage

- 3 In CannTrack, navigate to Reports → B300/B600/B267 Report. Select the current month. This shows stamps received, stamps used (Column C) and unusable stamps by region.
- 4 Expand the Vaping row by clicking the down arrow to reveal all eight jurisdictions. Note the value in Column C (Stamps used for products) for each region — this is current-month usage to date.

Stamp Type (Region)	B - Stamps received	C - Stamps used for products	D - Unusable stamps
Vaping	17,000	49,944	85
Alberta	0	750	1
Canada	5,000	10,070	11
Manitoba	0	716	0
New Brunswick	0	300	0
Nova Scotia	2,300	264	2
Ontario	0	7,422	10
Prince Edward Island	0	276	0
Quebec	10,000	30,166	61

Figure 2 — B300/B600/B267 Report, April 2026. Total used to date: 49,944 stamps.

 Stamp ordering

Procedure — Part 3: Build the planning sheet

- 5 In the working file, add four columns to the right of Unused: Current Month Usage, Need, Difference, and Order. Populate Current Month Usage from the B300 report by VLOOKUP or manual entry.
- 6 Calculate Need as Current Month Usage × 1.5. Calculate Difference as Need – Unused. A negative or zero Difference means no order is required for that jurisdiction.
- 7 Round each positive Difference up to the next 1,000 increment in the Order column. For Canada, Quebec and Ontario, round up to the next 5,000. The Order column is the final quantity to enter in the Excise Stamping System.

	A	B	C	D	E	F	G	H
1	STAMP CATEGORY	REGION	UNUSED	April Usage	Need	Difference	Order	
2	Vaping	Alberta	657	730	1095	438	1000	
3	Vaping	Canada	5856	10070	15105	9249	10000	
4	Vaping	Manitoba	2247	716	1074	-1173	0	
5	Vaping	New Brunswick	545	300	450	-95	0	
6	Vaping	Nova Scotia	2234	264	396	-1838	0	
7	Vaping	Ontario	7551	7422	11133	3582	5000	
8	Vaping	Prince Edward Island	642	276	414	-228	0	
9	Vaping	Quebec	19301	30166	45249	25948	30000

Procedure — Part 4: Submit the order

- 8 Return to CannTrack → Stamp Inventory and click the ORDER STAMPS button at the bottom of the page. Log in to the Excise Stamping System when prompted.
- 9 Select Create Stamp Order from the left navigation. Identify the next sequential PO number by reviewing the most recent order under View Stamp Orders. Format is #stmp### (e.g. if the last order was #stmp029, the next is #stmp030).
- 10 Configure the order header: Adhesive Option = Adhesive Stamps (always); Shipment Location = ADHESIVE CBN — Digital Smoke Supplies, Ottawa; Manufacturer PO# = next sequential number; Comments = "Shipping Brinks LVP, S2 adhesive" (copy from the previous order).

Procedure — Part 4: Submit the order (cont.)

- 11 Click ADD LINE ITEM (top-right of Product Information). For each jurisdiction with a non-zero Order quantity, select the product as [Region] — Vaping — Bundle (500 stamps). Enter Quantity of Bundles equal to the Order quantity divided by 500.
- 12 Verify the total Quantity of Stamps in the order matches the sum of the Order column in your planning sheet. The system displays running totals at the bottom of the line items list.
- 13 Click CREATE ORDER (top-right). Enter your password when prompted to confirm submission.

The screenshot shows the 'Create Stamp Order' page. On the left is a sidebar with navigation links. The main content area is divided into sections: 'Order Detail' and 'Product Information'.

Order Detail:

- Adhesive Option: Adhesive Stamps
- Shipment Location: ADHESIVE CBN (12686074 Canada Inc. - s/a Digital Smoke Supplies) (975, Ottawa, Ontario K1Y 4W5, Canada)
- Manufacturer PO#: #stmp030
- Comments: Shipping Brinks LVP: S2 adhesive

Product Information:

Products	Quantity of Unit(s)	Quantity of Bundle(s)	Quantity of Stamp(s)	Amount	Remove
Canada - Vaping - Bundle (500 stamps)	20	20	10,000	\$68.77	
Total Price (plus taxes, shipping and handling)			20	10,000	\$68.77

Figure 4 — Create Stamp Order page. PO# format and adhesive option visible.

Before clicking CREATE ORDER

Verify the running Quantity of Stamps total at the bottom of the line items list matches the sum of the Order column on your planning sheet. Once submitted, an order cannot be edited — corrections require cancelling the PO with CRA and resubmitting under a new PO number.

SOP-OPS-002
Stamp ordering

Procedure — Part 5: Confirm

- 14 CRA sends two emails: the first confirms the order has been received; the second confirms the order has been approved and is being processed. File both in the Operations shared inbox under the corresponding PO#.

Reference data

RULE	VALUE	NOTES
Cushion factor	1.5×	Of previous month's usage
Standard rounding	1,000 stamps	All low-volume jurisdictions
High-volume rounding	5,000 stamps	Canada, Quebec, Ontario
Bundle size	500 stamps	Fixed by CRA
Adhesive option	Adhesive Stamps	Always — never test stamps
Shipment location	ADHESIVE CBN Ottawa	Digital Smoke Supplies

Roles and responsibilities

- Operations Manager — owns the SOP, executes monthly, files CRA confirmations.
- Operations Coordinator — backup executor; cross-trained on full procedure.
- Finance — reconciles stamp invoice against PO# on receipt.

Non-compliance

Failure to execute this SOP on schedule risks stamp stockouts, which halt production and trigger downstream shipment delays to customers. Late or incorrect orders that result in unbudgeted expedited shipping costs will be reviewed by the Operations Manager and may be charged back to the responsible department.

Exceptions

Mid-cycle ad-hoc orders are permitted when actual usage runs materially ahead of forecast (e.g. unexpectedly large customer order). The Operations Manager must approve the off-cycle order and document the trigger in the Comments field of the PO. The 1.5× cushion rule still applies to the rolling forecast.
