

Return shipping label process for damaged bottles.

STANDARD OPERATING PROCEDURE — OPERATIONS

Document ID	SOP-OPS-004
Document type	Standard Operating Procedure
Department	Customer Success
Owner	Customer Success Lead
Version	v1.0
Effective	May 2026
Status	Draft — In review

1. Purpose

This SOP defines how Customer Success generates a return shipping label when a customer reports damaged bottles — typically cracked or leaking units. This process ensures replacements are sent only after we receive the damaged product and the correct quantity is confirmed, so DSS Distro avoids over-shipping high-cost freight on the basis of an unverified claim.

2. Scope

Applies to every return label created in Freightcom to return damaged e-liquid bottles previously delivered to a wholesale customer. Covers verification of the damage claim, approval, shipment creation, carrier selection, pickup scheduling, warehouse co-ordination, and delivery of the label to the customer.

Out of scope: initial customer-complaint intake (covered by SOP-CS-003 Handling customer quality product issues), credit-note or refund processing, and freight claims with the carrier for in-transit damage.

3. Roles and responsibilities

ROLE	RESPONSIBILITY
Customer Success Agent	Requests photo evidence from the customer when needed. Verifies the damaged-bottle quantity, creates the Freightcom shipment, schedules the pickup, sends the label to the customer. Notifies Warehouse Lead that we are expecting a return.

Warehouse Lead

Receives return and counts bottles, notifies Customer Success that return was successfully received. Picks and packs the replacement order once notified, hands the package to the carrier at the scheduled pickup window.

4. Step-by-step procedure

4.1 Verify the damage claim

Before generating any label, clarify the situation with the customer and the original order. Shipping costs are high and an inflated claim cannot be reversed once the freight is on the road.

- Confirm whether the customer reports **one bottle or multiple bottles** as damaged.
- Ask the customer to confirm the **exact quantity** of damaged units, per SKU.
- Request photos of the cracked or leaking bottles if the claim is not already documented.
- Do not generate a shipping label while any of the above is unclear.

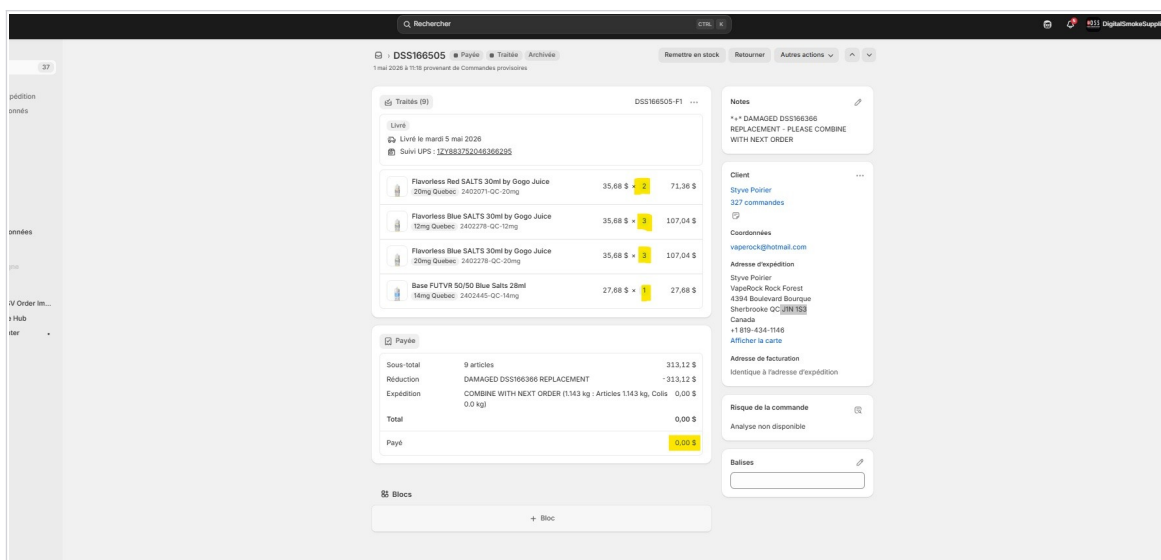

Figure 1 — Original Shopify order with the per-SKU quantities highlighted; verify the damaged count against this list before proceeding.

4.2 Log in to Freightcom

- Open <https://app.freightcom.com/> in a browser.
- Sign in with the shared DSS Distro Freightcom credentials.
- Username: digitalsmokes Password: shipping123
- Do not store the password in the browser on a shared workstation.

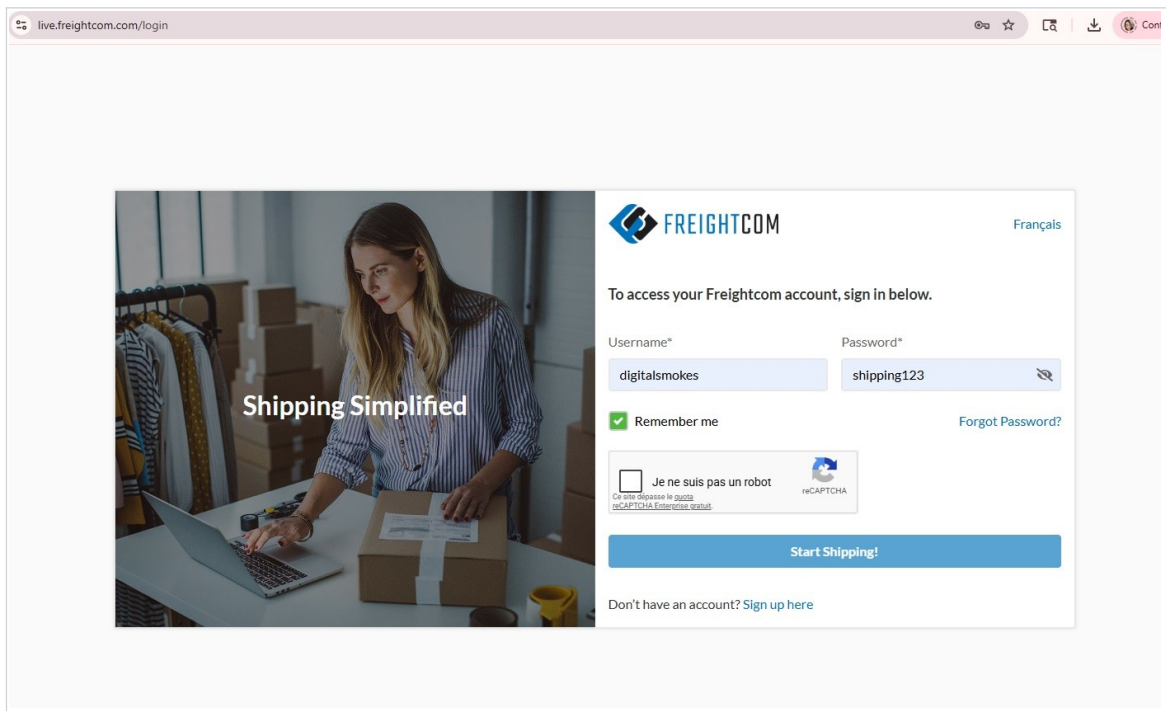

Figure 2 — Freightcom login page (live.freightcom.com/login).

4.3 Create the replacement shipment

From the Freightcom dashboard, open the Ship menu and start a new shipment. Use the original Shopify order as the source of truth for the customer's address.

1. Click **Ship** → **Create New Shipment**.
2. Under **Packaging Type**, select **Package** (should already be selected automatically). Click **Swap**.
3. In **Shipping From**, enter the customer's address exactly as it appears on the original Shopify order. (ex: Vape Rock Forest, 4394 Boulevard Bourque, Sherbrooke QC J1N 1S3).
4. In **Shipping To**, the warehouse address (our address) should automatically be there.

Figure 3 — Create New Shipment screen showing packaging type and the Shipping From / Shipping To blocks.

4.4 Enter dimensions and weight

Use the box-size and weight reference below. Choose the row that matches the total bottle count in the return. Mark the units as Imperial (in & lbs). In the Description field, enter “e-liquid”.

SHIPMENT SIZE	LENGTH (IN)	WIDTH (IN)	HEIGHT (IN)	WEIGHT (LBS)
Small — under 25 bottles	6	6	6	4
Medium — 25 to 50 bottles	12	6	6	8
Large — 50 to 100 bottles	14	10	6	15–18

Insurance Type

ⓘ Please note that without the purchase of Freightcom Insurance, the carrier's liability for any loss or damage to your Parcel Shipment will be limited to \$2.00 per pound or \$100.00 per shipment, whichever is applicable.

Figure 4 — Dimensions and weight form; quantity 1, imperial units, description “e-liquid”.

4.5 Get rates and choose the carrier

- Click **Get Rates** and review the carrier options.
- Only select **Purolator Ground** or **UPS**, check if customer has a preference.
- Select the cheapest option between the two (or the preferred carrier between the two, if applicable); do not add Freightcom additional insurance without Customer Success approval.

Please note that transit times are estimated and cannot account for any unforeseen delays.

Carrier	Service	Est. Transit	Shipping Rate	
	Ground	1 Day	\$9.56 CAD	Select + Additional Insurance
	Ground	1 Day	\$12.21 CAD	<input checked="" type="button" value="Selected"/> + Additional Insurance
	Standard	1 Day	\$12.44 CAD	Select + Additional Insurance
	Express	1 Day	\$15.09 CAD	Select

Figure 5 — Carrier rate selection; Purolator Ground 1-day selected for this shipment.

4.6 Confirm

- Make sure you've confirmed the quantity in writing with the customer before booking.
- If the customer claims 10 bottles damaged, confirm 10 in your email reply before booking 10.
- If the quantity changes after re-confirmation, return to step 4.5 and update the box size and weight before booking.

Once return is received, the Warehouse will count and confirm that this is indeed the amount the customer said it was. Sometimes they will say they had 10 and only send 5, for example.

4.7 Schedule the pickup

Once the customer has re-confirmed and the rate is selected, schedule the carrier pickup before booking the shipment. Pickup windows must match store hours.

1. Scroll to **Ready for Pickup** and select **Schedule pickup now**.
2. Set the pickup contact to **Warehouse Lead** with the warehouse phone number on file.
3. Set the pickup location to **Front Door**.
4. Choose a pickup date no earlier than the next business day (in some cases it can be same day, but for the most part, next business day).
5. Set times that fit the hours of the store that is returning the bottles (ex: 10 AM–5 PM or 12 PM–5 PM). 12PM-5PM is default if you do not know store hours/want to play it safe. Hours can easily be looked up if there is time for that extra step.
6. Click **Book Shipment Now** to confirm the pickup and generate the label.

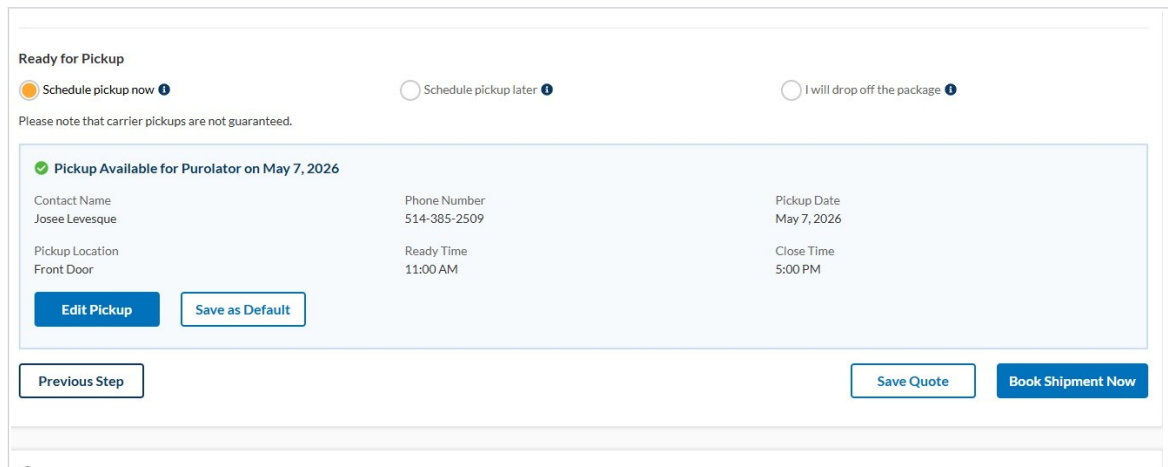

Figure 6 — Pickup scheduling panel with the warehouse contact and ready / close times.

4.8 Download the label

On the confirmation screen, capture the shipment identifiers and download the carrier label PDF.

- Record the **Tracking #**.
- Click **Shipping Label** → **Download** and save the PDF locally, keep the file name and add the store name after it.
- Verify the destination on the label matches the customer's Shopify address before sending.

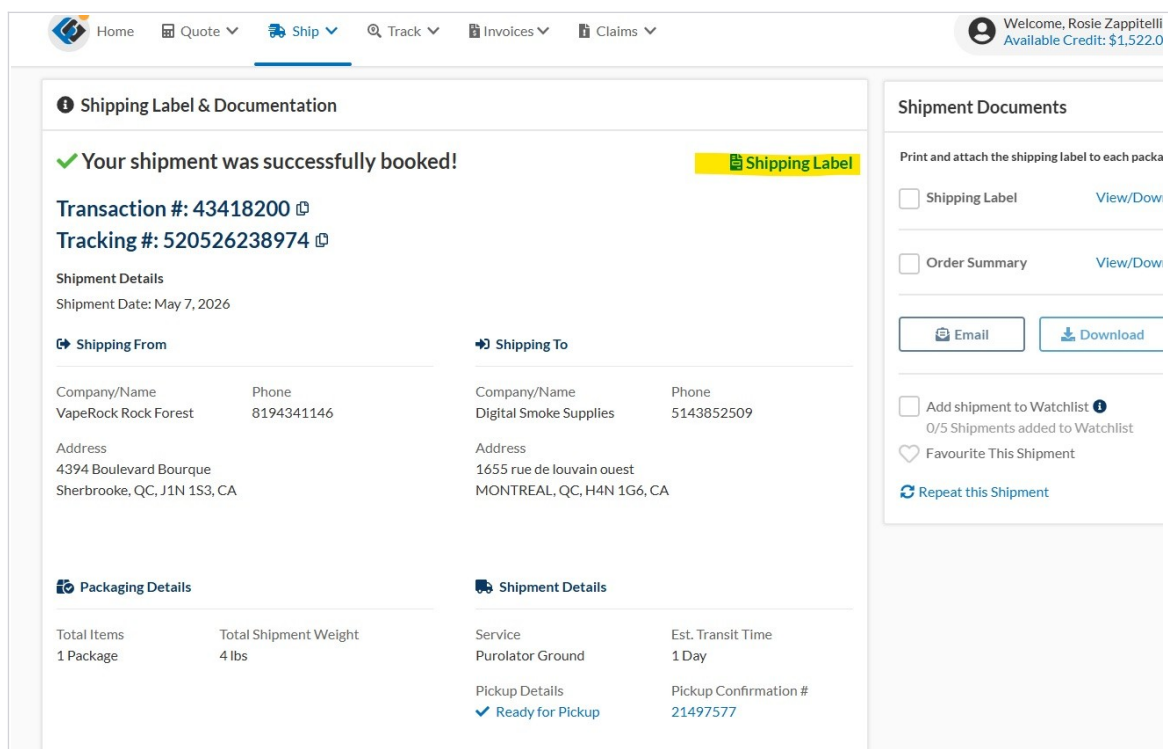

Figure 7 — Shipment booked confirmation; the Shipping Label button (top right) downloads the carrier-ready PDF.

4.9 Notify the warehouse

Notify the warehouse that we are expecting a return from this customer. The return needs to be confirmed received before creating a replacement order.

- Send an email to the Warehouse Lead.
- Include the **customer name**, the **products being returned** and **quantity** (ex: Flavorless Red SALTS 30ml by Gogo Juice — 20mg — Qty : 2).
- Attach the carrier label PDF, kindly request them to notify you when received.

FW: Retour de produits défectueux – étiquette de retour jointe

Salut Josée,

Merci de trouver en pièce jointe le shipping label que nous avons envoyé à Styve Poirier afin qu'il nous retourne les bouteilles suivantes :

- Flavorless Red SALTS 30ml by Gogo Juice — 20mg — Qty : 2
- Flavorless Blue SALTS 30ml by Gogo Juice — 12mg — Qty : 3
- Flavorless Blue SALTS 30ml by Gogo Juice — 20mg — Qty : 3
- Base FUTVR 50/50 Blue Salts 28ml — 14mg — Qty : 1

Merci de me confirmer une fois que nous aurons reçu le retour.

Merci,

Emna Belhaj
Customer Success

4.10 Send the label to the customer

- Reply to the customer's original email where they notified us of the damaged/leaking bottles.
- Reference the number of bottles and the scheduled pickup date and time in the email body.
- Check the tracking number on UPS or Purolator every so often to make sure the process is going smoothly. Warehouse is very busy so sometimes it will take them some time to confirm that they received the return. If you check the number and see it was delivered to us, then you can double check with them.

Hello Kiyo,

Thank you for the clarification.

Yes, that looks correct on our end. We will proceed with replacing the 4 affected bottles from the affected batch.

Please find the **return** label attached. The pickup is scheduled for tomorrow between 11:00 AM and 5:00 PM.

Thanks again for your attention to detail on this.

Best regards,

Emna Belhaj
Customer Success

5. Verification checklist

- Damaged bottle count is confirmed in writing by the customer.
- Photo evidence is on file or has been explicitly waived by Customer Success.
- Box size and weight match the bottle count per the reference table in section 4.5.
- Pickup window fits store's hours.
- Warehouse Lead has been notified with the label PDF attached.
- Customer email on the outgoing label notification matches the Shopify record.

Once we receive the return and warehouse has confirmed that we received the correct amount of bottles, proceed with the next steps (replacement order or credit/refund). Replacements are shipped with their next order, not alone. (There are specific cases where they can be shipped alone, discuss with Pamela first). How to do all of those options is covered in **SOP-CS-004_damaged-product-credits-refunds**.

Non-Compliance

Booking a Freightcom shipment before the customer has re-confirmed quantity, or without Customer Success approval, is treated as an operations incident. The Operations Coordinator absorbs the carrier cost of any cancelled or over-shipped label against their team's quarterly freight budget, the incident is logged in the Operations weekly review, and a repeat occurrence triggers a written warning from the Operations Manager. Do not skip the warehouse notification step (4.10) because it causes confusion, they need to know what is coming in and we want to have confirmation of receipt asap so we can resolve with the customer.

Exceptions

Two deviations are pre-approved. First, when the customer is a long-standing key account and the damaged quantity is one or two bottles, the Customer Success Lead may waive photo evidence; the waiver is noted on the Shopify order. Second, when a customer requires same-day dispatch, the Operations Manager may approve booking the shipment before written re-confirmation, provided the quantity is documented verbally with the Customer Success Lead and the approval is logged in the Operations weekly review. All other deviations require written approval from the Operations Manager before the label is booked.
